full CT volume
$\Omega \subset \mathbb{R}^3$, $|\Omega| = 512 \cdot 512 \cdot 200$
x: $M = 1$ (HU), shape $1 \times 512 \times 512 \times 200$
slices $z-1, z, z+1$
512
rows
200 slices (z)
512 columns
2.5D input x
$M = 3$ channels
$3 \times 512 \times 512$
$\Omega \subset \mathbb{R}^2$, $|\Omega| = 512^2$
output s_θ (slice z)
$K+1 = 5$ maps
$5 \times 512 \times 512$
(bg + 4 organs)
